USER ACTION

Certainly! Let's expand on the roles and actions in our app store By User:

Browse Apps :- Users can explore available apps by category, popularity, or other filters.

Search Apps :- Users can search for apps using keywords, tags, or specific criteria.

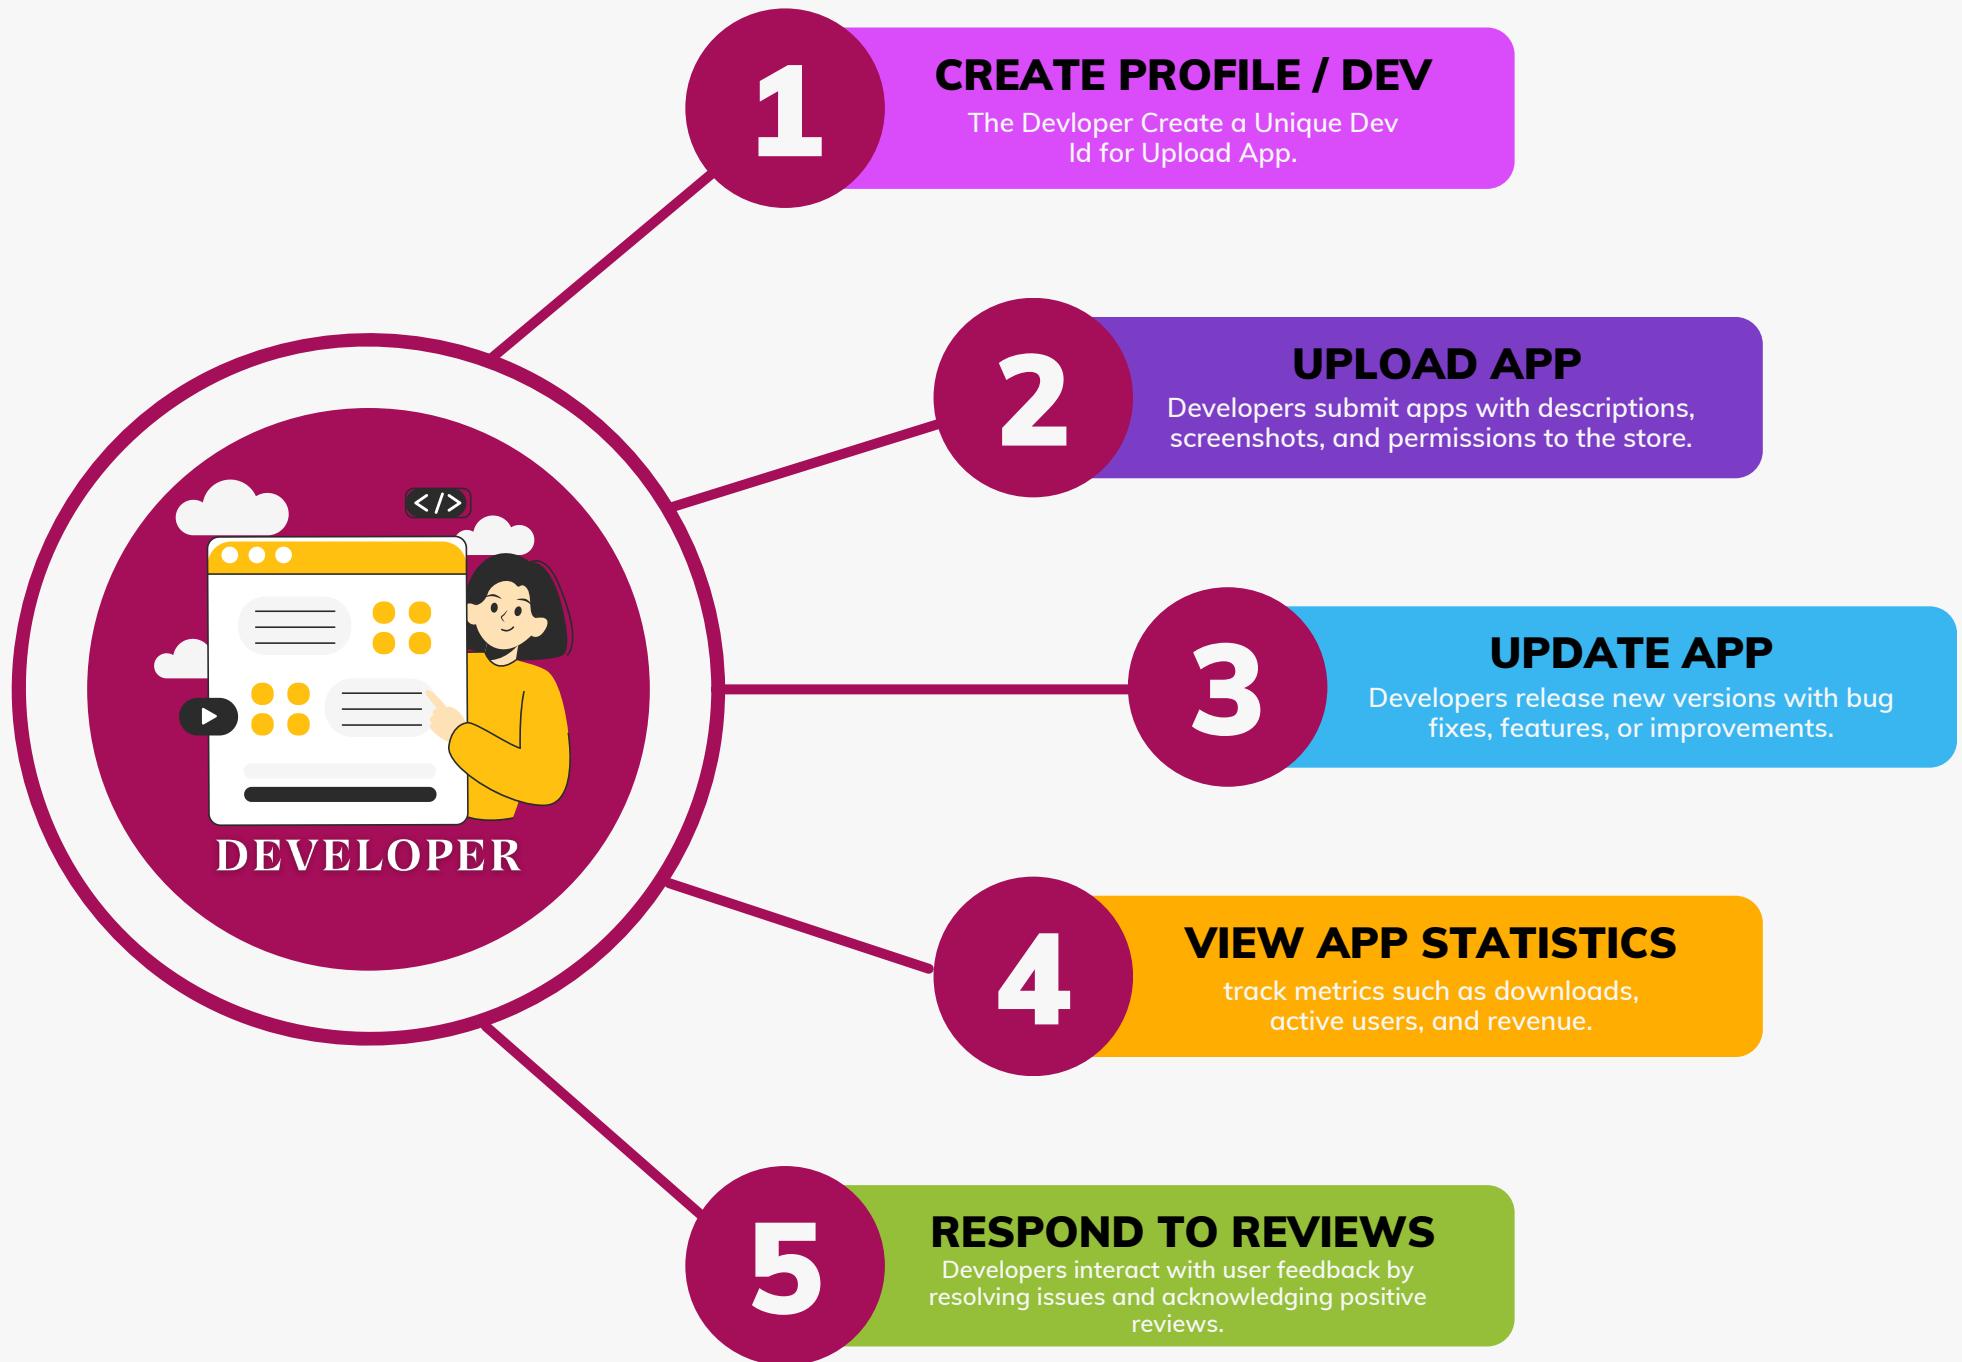

Download App :- After finding an app, users can download it to their devices.

Rate/Review App :- Users can provide ratings (e.g., stars) and write reviews to share their experiences with others.

Update App :- When developers release updates, users receive notifications and can choose to update their installed apps.

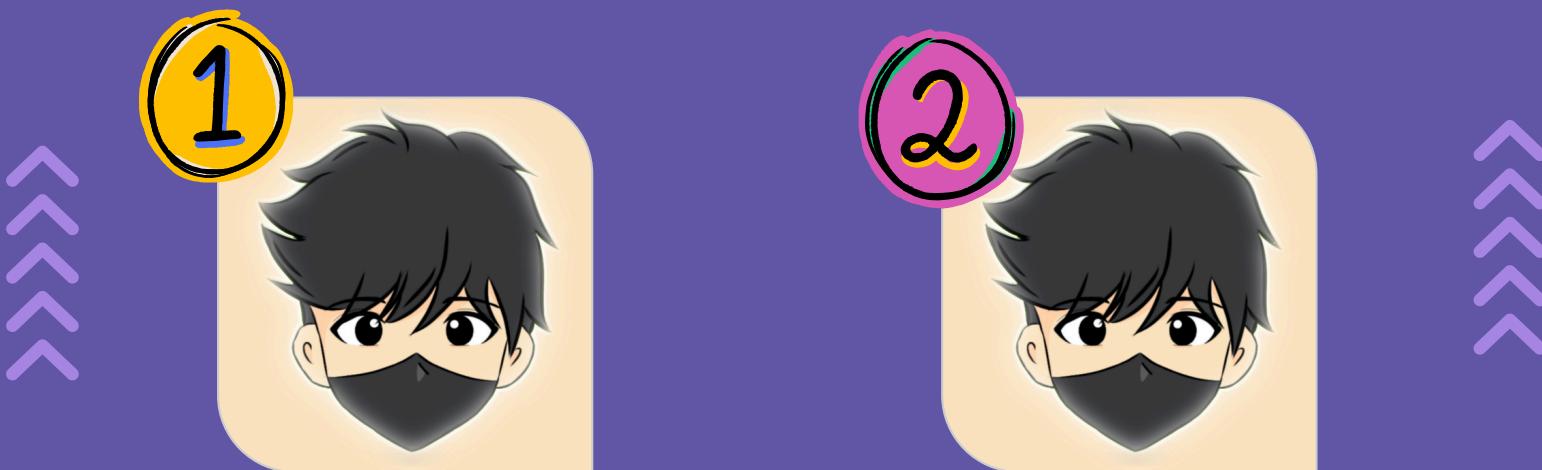

Uninstall App :-Users can remove apps they no longer need.

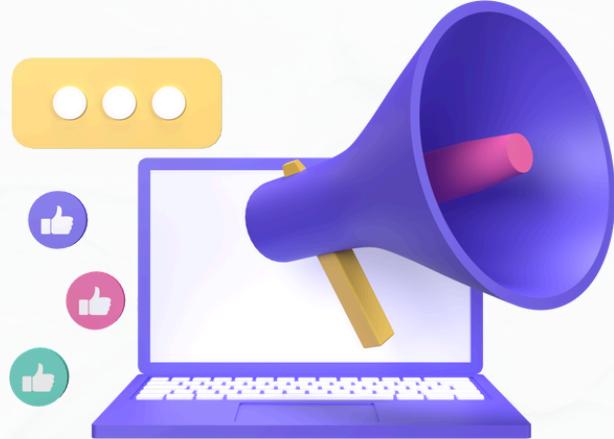

Bapa.apk

TOW - ADMIN

An app with two administrators: the primary admin manages all settings and user permissions, while the co-admin assists by handling specific tasks and providing backup support. Both roles ensure smooth operation and collaboration.
